**UNIVERSITY of INFORMATION  
TECHNOLOGY and MANAGEMENT**  
in Rzeszow, POLAND

## AVIATION MANAGEMENT

The University of Information Technology and Management is the fourth university in Europe and the first in Poland which introduced the Aviation Management course to its educational offer. This unique specialisation track is an undergraduate degree course in Economics which is entirely conducted in English. The course has been introduced in collaboration with the International University of Applied Sciences in Bad Honnef, Germany, where it has been successfully run for the last 10 years. The Aviation Management study programme meets the needs of the rapidly growing air transport market, which according to worldwide forecasts will demand a huge number of professionals in upcoming decades.

The UITM academic teachers are experts in the field with long experience and international career in aviation industry. During the 6-semester-study period our students acquire general economic knowledge, as well as wide expertise in aviation management.

**Lufthansa**

# AVIATION MANAGEMENT

## THE STUDY PROGRAMME INCLUDES, i.a.

- Aviation Law and Organization
- Airport Management
- Cargo Management
- Airline Sales and Yield Management
- Air Navigation and Aircraft Operation
- Ground Services
- Airline Network Management

*Airport Rzeszów – Jasionka*

Deutsche Lufthansa is a patron of the AvM specialisation track. Thanks to this, our students have a chance to undergo a job placement and vocational training in its headquarters.

## Job placements are also offered by:

- BBAA (Berlin-Brandenburgische Aerospace Allianz) – Berlin Aviation Cluster
- Rzeszów – Jasionka Airport - one of the fastest developing airports in Poland
- Why Not Fly - a travel agency
- MTU Aero Engines, Poland - a manufacturer of aircraft engine components for Boeing and Airbus

The University also collaborates with Desel Consulting and M2P which have a proven history of accomplishing dozens of international projects. Our partnership also includes the CHAMPIONS project which is aimed to improve the quality of intermodal connections in Central and Eastern Europe.
