NEW!

GENERAL AVIATION

Do you dream of working in the most dynamically growing sector of aviation in the world? Do you want to be one of experts who the future of the aviation sector belongs to? The study programme will be run exclusively for the elite group of 30 students selected from applicants from all over the world.

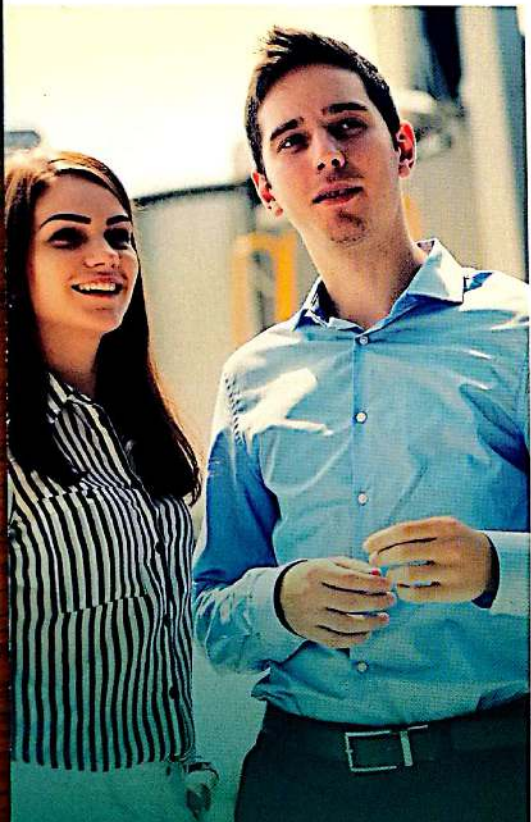

/ WHAT IS GENERAL AVIATION?

Did you know that flights classified as general aviation constitute the majority of air traffic in the world, and they are operated by more than 362,000 aircraft? This category of flights does not include scheduled flights or charter flights. In the United States there are only 500 airports operating according to the flight schedule, while more than 5,000 airports provide services for general aviation. Which of these airports' development would you like to contribute to?

General Aviation is a market segment related to air operations, such as small aircraft business flights (aircraft which take on board up to 20 passengers mostly from large corporations, clubs, as well as film stars, etc.) but also glider flights, planes carrying sky-divers and pilot training flights.

/ TAKE ADVANTAGE OF OUR EXPERIENCE

We have been carrying out research on the development of aviation market in Poland and around the world for many years, with major emphasis placed on the labour market in the sector. We respond to market needs and signals, talk to our business partners, aviation industry staff, as well as our Aviation Management alumni, who already work for various airlines, airports and companies related to the aviation industry. Our graduates are successful. Be one of them!

A group of 30
students selected from
candidates **from**
all over the world.

/ Expert's OPINION

"The General Aviation study programme is an excellent choice for aviation enthusiasts. Earnings on the Polish market currently range between 3,000 – 3,500 PLN, but here the market is still in its infancy. If you consider the West and specialists, the earnings range from \$4,000 for those entering the market to as much as \$7,000 for professionals with experience. Additional education in the field of Economics will make one's chances of getting a job in companies dealing with audits, HR as well as economic and financial analyses bigger. One of the biggest advantages of this specialisation is the university's experience in running the Aviation Management programme in the English language. The UITM has been running the study programme for more than 7 years and its graduates find jobs in the aviation sector worldwide."

Serhiy Hontaruk

practitioner with international experience in the airline industry, i.a. AECOM National Security Programs for NATO troops in Afghanistan, Ukrainian Helicopters company and AEROSVIT – Ukrainian airline; holder of IATA certificates

/ SUBJECTS:

Aircraft Financing | MRO in General Aviation | Terminal Development for General Aviation | International and National Regulations in General Aviation | General Aviation Operations | General Aviation Business | Airline Network Management | Airline Sales and Yield Management | Aviation Marketing | Air Navigation and Aircraft Operation

/ GET A PRESTIGIOUS ARCPort CERTIFICATE

The certificate is issued by Aviation Research Corporation in Vancouver, Canada. You can get it free of charge after the successful completion of the "Project Air 2" course, which will be run in semester 4. The certificate confirms competence in the use of the ARCPort program – an airport operations simulator – at intermediate level. The certificate will give you the chance to work in one of more than 80 international airports, which make use of this software on an everyday basis. The commercial price of such a certificate is about \$4,000.
