

PHYSIOTHERAPY – THE FACULTY OF MEDICINE

UNIVERSITY of INFORMATION
TECHNOLOGY and MANAGEMENT
in Rzeszow, POLAND

PHYSIOTHERAPY – THE FACULTY OF MEDICINE

The aging society and negative effects of civilisation's development contribute to the increasing need for patients' rehabilitation (including treatments that improve various body conditions), as well as getting support for healthy living, keeping physical and mental fitness.

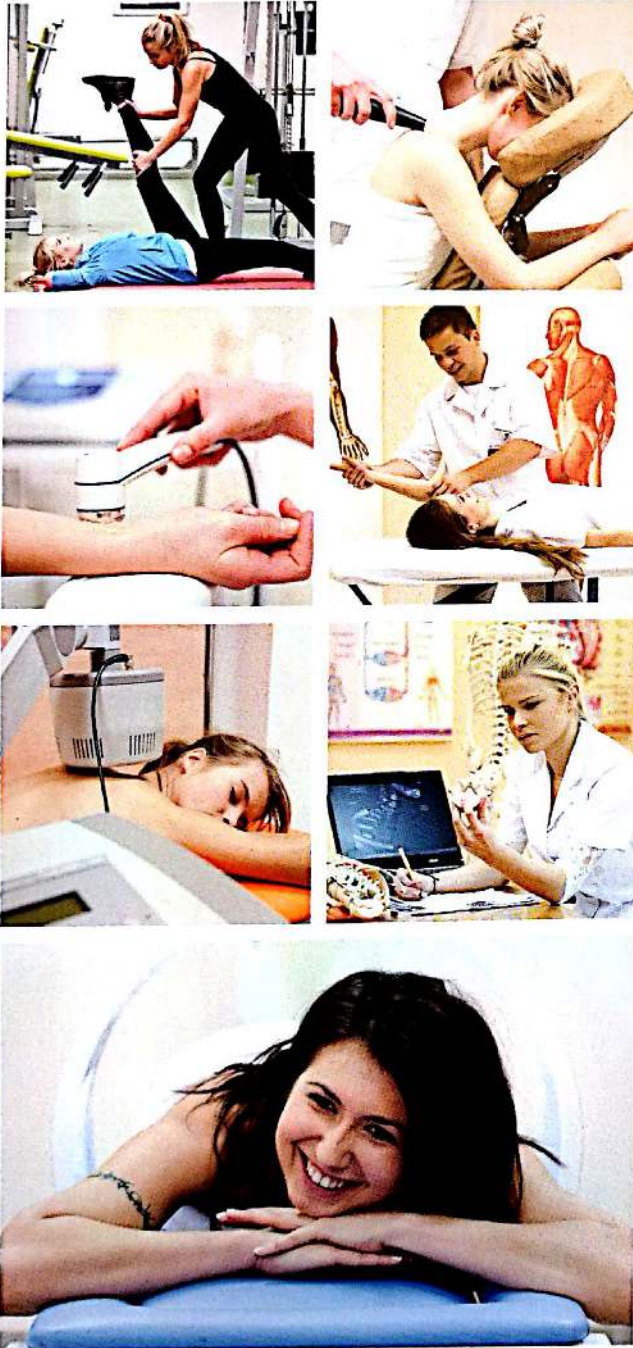

The course offered by the UITM has been developed with full reference to recent changes in health service provision in Poland and the EU. The programme will prepare students to be effective physiotherapist who use knowledge and skills and can position themselves easily on the job market.

PHYSIOTHERAPY AT UITM INCLUDES:

Taught classes in hospitals and health care centres

A considerable number of practical classes also taught on summer holidays

A considerable number of fitness and sports classes

PHYSIOTHERAPY – THE FACULTY OF MEDICINE

CAREER PROSPECTS:

A large number of practical classes carried out in health care centres will prepare a graduate for a professional career both as an independent worker and a rehabilitation team player. Graduates of physiotherapy have varied career opportunities, in particular in public health and social care. Thanks to their studies in the English language they have a chance to work in EU countries.

THE STUDY PROGRAMME INCLUDES, i.a.

- Kinesiotherapy
- Manual Therapy
- Fundamentals of Clinical Physiotherapy
- Clinical Physiotherapy in Disorders of Internal Organs
- Clinical Physiotherapy in Cardiology and Pulmonology
- Practical classes in renowned health care centres and other rehabilitation units
- Physical Therapy
- Therapeutic Massage
